Objectives

- To list and show tourist spots of Al Ain city in a map (digital) with attribute table.
- To help people (visitors) find easily where to stay and where to go and how to go (short path) distance and how much it will cost them.

Methodology

- Data collection from different sources.
- After that, we rectified base map with satellite image and entered data of Al Ain as parks, historical places, museums hotels etc. into system.
- Then analyzing the data to make it simple and useful for all and to add some images to make it more attractive.
- Presenting results in form of maps and report.

Conclusions

- Al Ain city has occupied special place among UAE cities because of its historical places, Oasis, Palm trees and its environment (less humidity). These factors make people to visit Al Ain.
- But Al Ain should try to improve its tourist destinations and give more facilities to visitors by opening more hotels, making tourist spots more convenient by making international standard food courts and improving toilets and other basic amenities.
